

**6th Annual International Conference on Language, Literature & Linguistics
(L3 2017)**

Speaker: Dr. Bryan Carter

Abstract

Experiencing the Digital Humanities

Dr. Carter will explore the intersection between humanities studies and digital technologies, offering an Afrofuturist perspective as we explore experiencing the humanities in new and engaging ways. We will experience the current state of Virtual Reality through the updated Virtual Harlem Project, iterations of Augmented Reality through a number of student created projects and the use of multimedia in the classroom for teaching and learning. Finally we will look at reasons why advancing technologies are becoming more attractive for use in the Humanities.
